

Issue with Users and Privileges in MySQL Workbench

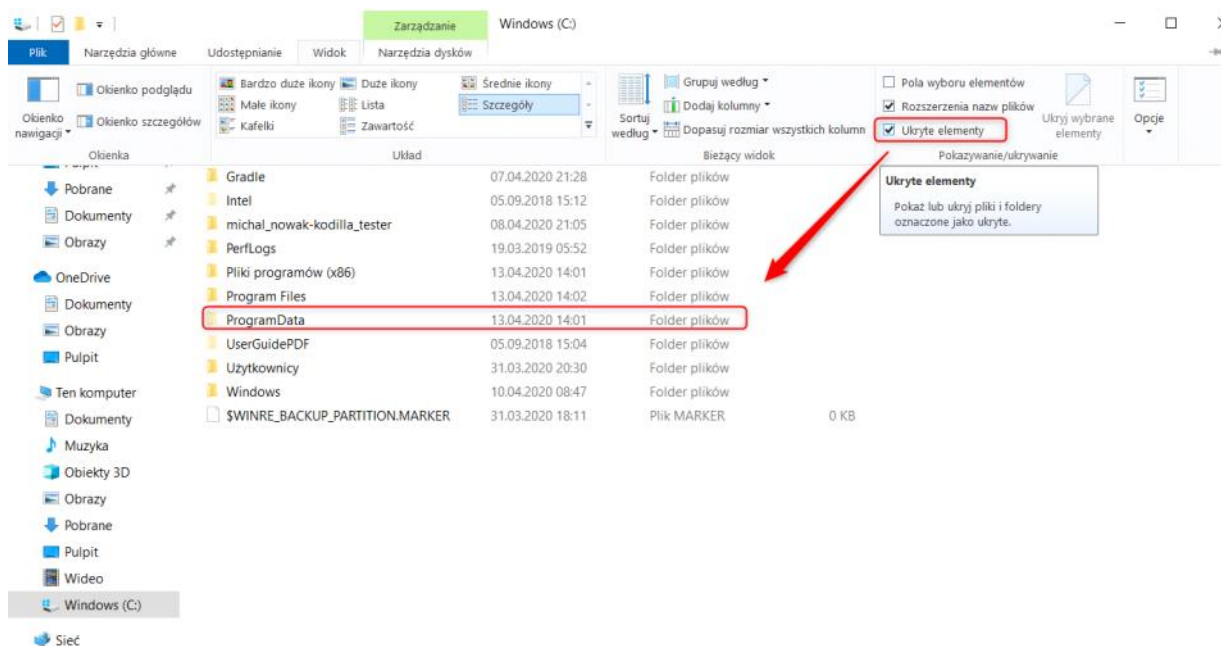

poniedziałek, 13 kwietnia 2020 14:08

Issue:

While trying to manage users and privileges I had a blank page in MySQLWorkbench. Even though I tried to uinstall it couple of times I still did not have any accounts.

Solution:

1. Uninstall all MySQL Tools.
2. Delete folder C:\ProgramData\MySQL from C ---> The folders ProgramData is located under hidden files.

3. Do healthy delete to all of your mysql files in C:\Users\mnpos\AppData\Roaming\MySQL.
